PROFESSIONAL SUMMARY

A motivated B.Tech-M.Tech student specializing in Cyber Security, with experience in CTF competitions and personal projects like image forensics and MFA system. Skilled in problem-solving, adaptability, and continuous learning, with a strong focus on SOC and SIEM. Actively contributing to open-source projects on GitHub.

EDUCATION

<i>B.Tech-M.Tech Computer Science(Cyber Security), National Forensic Sciences University, Gandhinagar</i>	2022-2027
CGPA: 8.5/10 (6 Semesters)	
<i>High School, Reliance Foundation School, Surat</i>	2022
12th CBSE Marks: 86.8%	
<i>Secondary School, J. H. Ambani Saraswati Vidyamandir School, Surat</i>	2020
10th CBSE Marks: 92.2%	

PROJECTS

Image Forensics Tool

- Developed a Python-based tool for digital image forensics to detect and analyze potential image manipulations.
- Implemented techniques to identify inconsistencies and alterations in digital images, aiding in the verification of image authenticity.
- Utilized libraries such as exifread and numpy for image processing tasks, enhancing the tool's capability to process and analyze images efficiently.
- Hosted the project on GitHub to facilitate collaboration and version control:- github.com/HEETKOTADIA/Image-Forensics

Multi-Factor Authentication System

- Developed a Python-based Multi-Factor Authentication (MFA) system to demonstrate enhanced user authentication through multiple verification layers.
- Includes password verification (first factor) and OTP-based authentication via email or authenticator app (second factor) using the pyotp and smtplib libraries.
- Hosted the project on GitHub to facilitate collaboration and version control:- github.com/HEETKOTADIA/Multi-Factor-Authentication

EXPERIENCE

<i>IT Trainee – Reliance Industries Limited, Hazira</i>	MAY 2025
• Developed a strong understanding of how IT integrates with hardware systems and their security architectures. • Learned how IT supports operations in a large-scale industrial environment. • Got to understand the cybersecurity framework implementation on the company's network and its regulatory compliance.	

SKILLS

Technical Skills:	Linux, Cryptography, Vulnerability Assesment, Digital Forensics
Programming Languages:	Python, Java, C, C++
DBMS:	MySQL, Oracle SQL
Soft Skills:	Leadership, Teamwork, Communication, Problem Solving, Time Management

CERTIFICATIONS

Certified Information Systems Security Professional (CISSP)	<i>Issued by: Packt, Coursera</i>
Google Cybersecurity	<i>Issued by: Google, Coursera</i>
AWS Academy Introduction to Cloud Semester 1	<i>Issued by: AWS Academy</i>
