PROFESSIONAL SUMMARY

As a final-year Computer Science student, I thrive on architecting solutions that connect data to users by querying databases like PostgreSQL and MongoDB and engineering insights with Python. My project experience includes developing a comprehensive loan approval dashboard in Power BI, and my training has given me exposure to enterprise-scale systems with AWS and Docker. I am eager to apply my analytical expertise and engineering mindset to a data role where I can build robust and efficient systems.

EDUCATION

BTech in Computer Science and Engineering, Symbiosis Institute of Technology, Pune **2022-2026**
CGPA: 8.12/10

High School, Reliance Foundation School, Surat **2022**
12th CBSE Marks: 89.6%

Secondary School, Reliance Foundation School, Surat **2020**
10th CBSE Marks: 93.2%

SKILLS

Programming Languages	Python, C++, C
Databases	PostgreSQL, MongoDB
Technologies, Frameworks & Tools	Next.js, React, Power BI, Git, Docker, RestAPI, Hadoop, AWS, Databricks
Soft Skills	Problem-Solving, Analytical Thinking, Communication, Critical Thinking, Continuous Learning, Creativity

EXPERIENCE

Reliance Industries Limited, Hazira, Gujarat **June 2025**
Vocational IT Trainee – Industrial Training

- Gained exposure to enterprise-scale IT infrastructure, including networking architecture, server administration, SAP-based enterprise applications, and Oracle database management within a high-availability industrial environment.
- Developed foundational understanding of cybersecurity practices, IT compliance, and threat mitigation strategies used in critical infrastructure settings.
- Explored modern industrial technologies such as Industry 4.0, digital twins, and IT monitoring systems, building awareness of cutting-edge solutions adopted in large-scale digital transformation initiatives.

PROJECTS

SYNKRO **January 2025-Present**
(NextJS, MongoDB, Neo4j, Docker, Jenkins)

- Currently leading the design and planning of SynKro, a next-generation collaborative platform aimed at bridging the gap between students and professionals for streamlined project-based learning and mentorship.
- SynKro will offer an integrated ecosystem for project management, team collaboration, and networking, including features such as user profiles, real-time messaging, project dashboards, and intelligent recommendations using graph-based connections.

LOAN APPROVAL DASHBOARD

April 2025

(Power BI)

- Designed an interactive Loan Approval Dashboard in Power BI to visualize and analyze loan application data across demographics and income categories.
- Implemented dynamic filters and interactive visuals (scatter plots, bar charts, donut charts) for in-depth loan insights and decision-making.
- Enabled business stakeholders to identify approval patterns and optimize strategies based on applicant profiles and income segments.

RESTAURANT RESERVATION SYSTEM

September 2024 – November 2024

(MERN Stack – BotPress)

- Developed an intuitive online platform enabling users to seamlessly book, modify, search, and cancel restaurant reservations, streamlining operations and enhancing customer convenience.
- Integrated SymbiHelp Chatbot, powered by BotPress, to provide AI-driven, real-time responses to user inquiries about menu options, availability, and reservation support
- Designed and implemented a dynamic, responsive, and user-friendly UI focused on delivering accessible and engaging user experience. Utilized the MERN stack (MongoDB, Express, React, Node.js) to build a scalable and robust full-stack application.

ACHIEVEMENTS

- Earned a badge for solving the **Top 50 SQL** Questions on LeetCode, demonstrating strong command of SQL query optimization and data manipulation.

CERTIFICATIONS

- **AWS Cloud Technical Essentials**, *Issued by: Coursera*
- **SQL (Intermediate)**, *Issued by: HackerRank*
- **Google Data Analytics**, *Issued by: Coursera*
- **Introduction to Cloud Computing**, *Issued by: Coursera*
- **IBM Data Science**, *Issued by: Coursera*
