PROFESSIONAL SUMMARY

Aspiring Data Analyst with a strong foundation in Power BI, Python, and SQL. Experienced in working with real-world datasets through projects in sales analytics, sports data, and fraud detection. Eager to apply data storytelling and visualization skills to solve business problems and continuously learn emerging tools.

EDUCATION

<i>BTech in Computer Engineering at C.K Pithawalla College of Engineering and Technology, Surat</i>	2022-2026
CGPA: 8.09/10 (6 Semesters)	
<i>High School, Reliance Foundation School, Surat</i>	2022
12th CBSE Marks: 86.6%	
<i>Secondary School, J. H. Ambani Saraswati Vidyamandir School, Surat</i>	2020
10th CBSE Marks: 89%	

EXPERIENCE

Microsoft Data & AI Skills Internship - Virtual Internship – Microsoft Corporation (India) Pvt. Ltd.

Duration: July 2025 (64 Hours)

- Gained experience in **AI/ML technologies**, focusing on **Azure AI and Generative AI models**.
- Developed an **NLP solution** as part of AI case studies
- Designed and implemented **interactive Power BI dashboards** with advanced **DAX calculations**, enabling deeper business insights and data-driven decision making.

PROJECTS

1. Atliq Hardware Data Analysis (Power BI)

- Analysed sales and revenue contribution across markets, customers, and products.
- Built interactive dashboards to track KPIs like Revenue Contribution % and Profit Margin %.
- Enabled business leaders to make data-driven decisions with clear visual insights.

2. ICC T20 World Cup Data Analysis (Power BI)

- Performed end-to-end analysis on T20 World Cup dataset.
- Identified top-performing teams and selected the “Best XI” players using performance metrics.
- Designed an interactive Power BI dashboard for match statistics and player contributions.

3. Credit Card Fraud Detection (Python, Scikit-learn, Google Colab, Kaggle Dataset)

- Conducted EDA and visualized fraud vs. non-fraud transaction patterns.
- Pre-processed data: feature selection, categorical encoding, and splitting into train/test sets.
- Trained and compared **Logistic Regression** and **Random Forest** models.
- Achieved higher recall for fraud detection using Random Forest, demonstrating its effectiveness for imbalanced datasets.

4. House Price Classifier (Python, Jupyter Notebook)

- Developed a decision tree model to predict house selling probability based on features like price, location, and amenities.
- Implemented preprocessing, feature engineering, and model evaluation (accuracy ~60%).

POSITION OF RESPONSIBILITY

1. Volunteer - Technical Fest -INSPIRE (C. K. Pithawalla College of Engineering and Technology)
 - Volunteered in organizing a game event as part of the INSPIRE technical fest, where over 100 teams participated, each with 2 members. Coordinated logistics, managed registrations, and ensured smooth execution of the event.

SKILLS

Programming & Analysis: Python (Pandas, NumPy, Scikit-learn), SQL, Excel, Java, C, HTML, CSS, Javascript, PHP

Data Visualization & BI Tools: Power BI, DAX, Cognos Analytics, Matplotlib, Seaborn

Databases: MySQL, Relational Databases

Core Competencies: Data Cleaning, Exploratory Data Analysis (EDA), Data Visualization, Predictive Modeling, Statistical Analysis

Soft Skills: Leadership, Communication, Problem Solving, Teamwork

CERTIFICATIONS

IBM Data Analyst Professional Certificate	– Coursera
SAP Code Unnati advanced program	– Edunet Foundation
Programming in C	– Infosys Springboard
Java for Beginners	– Infosys Springboard
